

BACHELOR'S DEGREE IN FOOD ENGINEERING

PROFESSIONAL PROFILE

240 ECTS

The Bachelor's Degree in Food Engineering trains professionals with the ability to:

- Design, lead and manage engineering projects, such as the construction of food storage warehouses and facilities, or processes for the food industry.
- Apply and manage processing, preservation and distribution technologies in the food industry.
- Implement and execute quality, food safety and sustainability management systems in the food industry.
- Meet the needs of the social demand for functional food and, in general, healthy food.
- Qualification for the regulated profession of Technical Agricultural Engineer in a branch of the Agro-food Industry.
- Gain admittance directly on the Agricultural Engineer training through the Master's Degree in Agricultural Engineering.
- Gain admittance directly on the different Master's Degrees offered by the ETSIAAB.
- High employability.

ACCREDITATIONS
